SMARTDIGIT

For **"NEWTON"** electronic labels

SOLUM
Solution provider.

In this catalog you will find the widest variety of accessories designed specifically for the "NEWTON ESL SOLUM"

All the accessories are specifically designed to be applied with each electronic label model.
ESL ACCESSORIES

SMARTDIGIT

CATALOGUES

See our "supports" and "shelf profiles" catalogs, where you will find the widest assortment of items designed specifically for solum newton electronic labels.

SHELF PROFILES

Our catalog represents a large assortment of profiles for the different types of shelves on the market.

If the profile you need is not in this catalog, we can develop it in a short period of time.

We keep a permanent stock of all referenced models in lengths of 985 and 1315 mm and in transparent and black COLORS.

All our profiles are made of a single piece; that is, they are inserted directly into the front of the shelf without requiring any assembly or other manipulations.

SUPPORTS

In this catalog you will find the widest assortment of supports designed specifically for the "NEWTON ESL SOLUM".

All holders are specifically designed for your application with each electronic tag model.

Most have inserts that, in combination with our accessories, allow each label model to be displayed in different positions to adapt to any type of furniture and surface, adapting to any situation that you need in your store.

In cases where these supports come into contact with food, the materials with which they have been manufactured are special for food use.

If you do not find the support you need, contact us and we will develop it in the shortest possible time.

Newton Localization System

Newton incorporates its own label positioning system that makes it easier for Managers, staff and customers to find the right location of a product.
The most competitive solution in terms of costs, as you do not need any additional infrastructure or a different server.

Now, it's easier for managers and staff to navigate and locate what products need to be replenished.

Customers can locate the product from their mobile devices.
